My Resumé

Summary

A student with a passion for technological innovation and bringing a difference to the community, like the creation of new types of Artificial Intelligence. With that, I have always had the objective to study Computer Science, which will help me achieve my greatest dream, which is to better Digital Education in Brazil, as discussions over the Digital Divide have become vital. In my spare time, I usually play different types of games, practice sports, prepare RPG (Role Playing Games) sessions and work on various social projects, which made me realise that bettering Technological Education in Brazil was my main goal in life. Playing games and RPGs makes me a better person to work in a team, as my communication, creativity, and logical reasoning skills get challenged and improved.

Education

School of the Nations

Brasília, Brazil

US and Brazilian High School Diplomas

Graduation June 17th, 2023
